### First ZS Worked All States Triple Play Award

Barry, ZS2EZ, has informed HF Happenings that the first ZS WAS Triple Play Award has been issued by the ARRL, to a radio amateur in Port Elizabeth, namely Barry Murrell, ZS2EZ! It is Award no 492 issued on Friday 07 January 2011. This award was completed and applied for on 17 December 2010.

The Triple Play Award requires working all 50 US States on SSB, CW and RTTY (150 contacts) with all confirmations via LoTW. Only contacts from 1 January 2009 count.

Barry says he beat Donovan, ZS2DL to the award by 2,5 weeks - Donovan has also completed his award and awaiting the issue of his award.

Well done Barry!

### The PEARS National VHF/UHF contest

The PEARS National VHF/UHF contest will take place on 21 to 23 January 2011. It is open to all licensed amateurs in South Africa and the neighbouring states of Namibia (V5), Botswana (A2), Zimbabwe (Z2), Mozambique (9), Lesotho (7P), and Swaziland (3DA). Only contacts with these states will count.

The aim of a VHF/UHF contest is to make many long-distance contacts, establish new records, encourage the improvement of equipment and have fun. This is a 44-hour dual contest for digital and analogue modes. Amateurs are requested to participate in both contests if possi-

ble and thus keep the bands alive. Activity will take place on 6, 4 and 2 metres as well as on 70 and 23 cm using FM, SSB and digital modes.

The first 22-hour session of the VHF/UHF contest starts at 18:00 CAT on Friday 21 January and closes at 16:00 CAT on Saturday 22 January. The second 22-hour leg starts at 16:01 CAT on Saturday 22 January and ends at 14:00 CAT on Sunday 23 January.

A valid contact consists of an exchange of call signs, signal reports and location such as the six-digit Maidenhead Locator or co-ordinates. Participation can be as a Base station, a Field station, a Club/Multi-Operator station, or a Limited Category station. The complete rules can be found in the 2011 SARL Contest Manual and on the PEARS website at [www.zs2pe.co.za/Contests/vuhf.htm](http://www.zs2pe.co.za/Contests/vuhf.htm).

### SARL Summer QRP Contest

This QRP contest is intended to be a fun activity to promote QRP operation between radio amateurs in Southern Africa. Using homebuilt equipment or operating as a portable / field station and using temporary antennas is encouraged, but is not a requirement.

The contest will be run on Saturday 22 January from 12:00 to 15:00 UTC (14:00 to 17:00 CAT). Home or field stations are welcome to participate. Stations may use SSB or CW or mixed (SSB/CW) with 5 watts (PEP) output or less. A station may be contacted once per mode.

The contest takes place on 40 metres using the following frequencies CW: 7 000 - 7 025 kHz and SSB: 7 060 - 7 100 kHz and 7 130 - 7 200 kHz.

The complete rules can be found in the 2011 Contest Manual or Blue Book.

### Uruguay's radio amateurs celebrate Louis Varney's birthday

Uruguayan radio hams plan to use the special call CW5RV to commemorate the 100<sup>th</sup> birthday of Louis Varney, G5RV/CX5RV (1911 - 2000), the inventor of the famous G5RV antenna. QSL to PO Box 6000, 11000 Montevideo, Uruguay.

### The Flyleaf Killer (Novel)

Rob Mannion, G3XFD, the editor of Practical Wireless, says, "It's not often I get the pleasure of meeting other Radio Amateurs who are also keen novelists!

However, meeting Bill Prater, GOEOL, at the Newark amateur Radio Show in October 2010, was indeed a pleasure and I was soon to find out this bright and sprightly 80-year old has produced a most unusual psychological thriller. Bill presented me with a copy - a hard bound book - and it provided interesting reading over a few days!

## January 2011

- 30 Closing date for motions for the 2011 SARL AGM; Closing date for phase 1 of the construction competition

Without spoiling the plot, I think that if you were ever bullied at school and wished you had a big brother or some other way of taking revenge - you will find Bill's book exciting but disturbing reading - but not just before bedtime! If you enjoy tense, psychological themes - you will really enjoy Bill's murderous plot!

Bill, GOEOL, like many budding authors, had to resort to 'self-publishing' to get his book into print and I'm pleased he did, as I enjoyed it!

Copies of the well-produced hard-backed 'The Flyleaf Killer' are available direct from Bill for £10, which includes Postage and Packing. For further information contact him at 44 Alundale Road, Winsford, Cheshire CW7 2QD. Tel 01606 594205. E-mail [billg0eol@o2.co.uk](mailto:billg0eol@o2.co.uk)

### SARL National Field Day

Another correction (and this is the last one) - the contest committee received 22 logs for the November SARL National Field Day made up of three single operators, twelve multi-operators and seven general stations. The log was submitted via e-mail and got stuck somewhere on a server (gremlins and Murphy?) but it has been retrieved and accepted.

### *LOTW Now Supports VUCC*

It was announced this past week that the "ARRL's Logbook of the World (LoTW) - an online system for amateurs to confirm two-way contacts that can be used for various ARRL awards - has been upgraded to support awards based on Maidenhead grid squares, such as VUCC and the Fred Fish Memorial Award.

To take advantage of the new features, you need to log in to your LoTW account. (Do not have a LoTW account? It is easy to sign up. Go to <http://www.arrl.org/instructions>

VUCC is an open-ended award in that radio amateurs can work on throughout their lifetime, just like DXCC. However, like the Worked All States (WAS) award, the VUCC rules require all the contacts to be made from a defined area.

For VHF and UHF QSOs on 1296 MHz and below, this distance must be within 200 km on 1296 MHz and below. For SHF awards, contacts must be made from a single location, defined as within a 300 metre diameter circle. As such, the VUCC support in LoTW allows you to make the rule - or rules - necessary to find the QSLs in LoTW that satisfy the VUCC rules." For the complete announcement, go to <http://www.arrl.org/news/view/logbook-of-the-world-now-supports-vucc>
